

List of all Bridges in Wharfedale upstream of Bolton Bridge

Listed below are, what we believe to be, all the bridges over rivers, gills and becks in the catchment area of the River Wharfe upstream of Bolton Bridge. Those bridges given a date are shown in the 'List of Bridges', a document from 1731. Bridge markers, if they are there, can be up to 100m from the start of the bridge or causeway to the bridge. Many of the small bridges over gills would have been fords, but must be checked for completeness. Please enter data on each bridge inspected in the Data Entry form.

This list will be updated if new bridges are found or as new information arises

Version Number 5 24/2/22

UWHG Reference	List of Bridges Reference	List of Bridges Ref date. Green shading = Riding Bridge. Orange shading = Parish/Wapontake	Bridge Description (Descriptions in bold are as shown in 'List of Bridges')	Location	River	Approx grid reference to centre of bridge using Grid Reference Finder	Latitude	Longitude	Stone, Stone Cross, Cast Iron WR or other marker seen or reported	Visited	Comment
